Sample PDF

Using Acrobat PDFs are a great way to publish your content and have it formatted for printing and viewing.

Continue working with your documents using Word, Excel, Publisher, what-ever and email the files to your webmaster who can quickly publish them as Adobe PDF files. This saves much time and \$\$ as opposed to reformatting the content so it is web ready. A PDF (Printable Document Format) imbeds the fonts and the special formatting you add so everything remains as you intended when viewing and printing. Plus PDF files are already web ready – all devices can view these... everyone knows what they have to do to get the free acrobat pdf reader.
